## Skills

As a recent Computer Science graduate, I am excited to pursue a career as a junior frontend developer. I have gained valuable experience over the past few years, both through three internships and more recently via the Meta Front-End Developer Certification program. Through these opportunities, I have worked with a variety of technologies, including TypeScript, Bootstrap, Chakra UI, Formik and Yup. While I have some experience with these tools, I am most confident in my skills with HTML, CSS, Tailwind CSS and JavaScript, and have developed strong skills in using them to build responsive and engaging user interfaces.

While I am still learning, I am certain of my ability to work with these tools to create visually appealing and functional websites. I am also currently expanding my skills in React and Next.js, with a goal of becoming proficient in both.

Furthermore, I possess experience utilizing Git for version control, allowing for streamlined collaboration with colleagues and accurate tracking of code changes..

As a hard worker and fast learner, I thrive in dynamic environments that challenge me to constantly learn and grow. My positive attitude and social nature make me a pleasure to work with, and my creativity allows me to approach problems from unique angles to deliver innovative solutions. When I'm not coding up a storm, you can find me trying out new recipes in the kitchen, painting or snowboarding. If you're looking for a team player with a can-do attitude, I'm your gal.

## Experience

November 2019 - May 2022

**Self employed, Romania** – *Wordpress website developer & social media manager*

In my previous role, I developed custom WordPress websites for various businesses, taking pride in my work on projects like <https://rv4travel.ro/>. Alongside this, I also managed social media accounts for businesses and micro influencers, creating and executing strategies to improve engagement and reach.

July 2021 - August 2021

**BK Hosting, Brasov, Romania** – *Web development intern*

As part of a team working on a toy project designed for interns, I had the opportunity to contribute to the development of a search functionality using Algolia. Throughout the project, I was dedicated

to ensuring its success and collaborated effectively with my peers to overcome any obstacles we encountered. This experience required me to work with a variety of technologies such as JavaScript, TypeScript, NodeJS, MongoDB, Docker, React, Algolia, and Git, which allowed me to expand my skills and knowledge in these areas.

July 2020 - August 2020

**Mero, Craiova, Romania** – *Web development intern*

As part of my role in production work, I was responsible for designing and implementing new functionality, including the integration of Facebook login. With the guidance of my tutor, I utilized a range of technologies, including JavaScript, TypeScript, NodeJS, MongoDB, and Git, to ensure the successful deployment of the feature.

October 2019 - November 2019

**CS Nine GmbH, Vienna, Austria** – *Web development intern*

During my initial foray into web technologies, I gained hands-on experience through tasks like implementing buttons, forms, and developing simple functionalities. This allowed me to familiarize myself with technologies such as JavaScript, Ionic, Angular, and SQL Server, which formed the foundation of my subsequent work in the field.

## Education

October 2022 - Present

**Meta Front-End Developer Certification**

*Professional certificate on completion*

I gained experience developing responsive websites using React to structure content, CSS and either Bootstrap or Chakra UI for visually appealing designs. To enhance the interactivity of the websites, I utilized JavaScript and implemented Formik for seamless form creation and Yup for thorough form validation. Finally, I leveraged the power of GitHub for version control to manage and streamline the development process.

October 2018 - July 2022

**Faculty of Automation, Computers and Electronics – University of Craiova**

*Engineering bachelor's degree*

I have completed a degree program in Computers and Information Technology, taught entirely in English, that included a wide range of subjects such as software and hardware development, mathematics, electronics, microcontrollers, computer architecture, data structures and algorithms, databases, mobile development, web development, AI, ML, and many more. It was a comprehensive program that provided exposure to many different areas of the field.

March 2019 - May 2019

**How to build a Facebook app from A to Z Course, Craiova**

*Participation diploma*

I'll admit, when I first took this course, it was like trying to read a foreign language! But I give it credit for being ahead of its time, introducing me to the world of web development before it was even on my university's radar. Looking back, it was a great starting point for my journey in the field!

## Certificates

→ CAE C1 (Certificate in Advanced English):

- ◆ Demonstrates proficiency in advanced English language skills, including reading, writing, listening, and speaking;
- ◆ Provides evidence of the ability to communicate effectively in a wide range of professional and social contexts.

→ ECDL (European Computer Driving License):

- ◆ Use of word processing software (Microsoft Word) to create and format professional documents;
- ◆ Creation of spreadsheets (Microsoft Excel) for data management and analysis;
- ◆ Knowledge of presentation software (Microsoft PowerPoint) and ability to create effective visual aids;
- ◆ Proficiency in using email and other communication tools for efficient workplace communication;
- ◆ Understanding of the basics of databases and ability to enter, manage and retrieve data using database software, including Microsoft Access.
